been involved with for many years.

Imagine what it can do to enhance your business and career?

DaVinci Business School was founded on the principles of Mode 2 knowledge production and while the approach has evolved beyond its original conception, we continue to espouse the spirit of Mode 2 ushered in the 4th industrial revolution, and by establishing an innovation value-chain with an ever growing number of stakeholders. This ensures a focus on the creation of knowledge that is transdisciplinary in nature, socially relevant, actively promotes diversity and heterogeneity.

The intention is to apply situated learning, problem-probing and decision-making to solve work-based challenges, and contribute to the professional development of our students and their teams they lead.

The Da Vinci Institute for Technology Management (Pty) Ltd. Registered with the Department of Higher Education and Training as a private higher education institution under the Higher Education Act, 1997. Registration No. 2004/HE07/003. This qualification is accredited by the Council on Higher Education and registered on the National Qualification Framework (NQF) by the South African Qualification Authority (SQA).

- Actively promoting diversity and heterogeneity
- Advocating and managing quality in meaningful ways
- Acknowledging the world as a set of interconnected systems
- Awakening the senses
- Embracing holism and living harmoniously
- Appreciating the shadow
- Mastering balance with integrity
- Having a distinctive voice.

OVERVIEW OF THE MASTER OF MANAGEMENT IN TECHNOLOGY AND INNOVATION

The purpose of this qualification is to provide managers with the means to cultivate the knowledge and skills that will enable them to address local and international organisational challenges, through an integrated business leadership approach. This approach focuses on the application of specialised knowledge, skills, and experience in the fields of management and leadership development, within a research-driven context.

The qualification develops the student's capacity to: create strategies to address organisational challenges through the integrated application of theoretical knowledge, practical knowledge, systemic principles and advanced analytical and problem-solving skills; develop targeted personal competence in the chosen research topic; incorporate in the research process appropriate research methodologies and academic writing techniques; critically reflect on research outcomes and results within an ethical framework; construct strategies that incorporate the principles of technology management, innovation management, people management, and systems

“The Master’s programme at Da Vinci was a wonderful experience, and I feel privileged to have been a part of this incredible journey together with Da Vinci. It is a life-changing experience that will always remain a part of my private and working life going forward.”

Cornelis van der Walt

Master’s alumnus DaVinci Business School

management; develop innovative strategies to address socio-economic transformation challenges.

The qualification further aims to recognise those who have the acquired competence in the field of research to serve in transformational management positions in organisations or self-owned businesses. The key objective is the development of business leaders who will initiate socio-economic change interventions and sustainable business development initiatives. The qualification aims to instil in students a thorough understanding of the application of the key elements of systems thinking, business development, technology management, and innovation, as well as people development, whilst focusing on sustainability and the increased local and international competitiveness.

The Da Vinci Institute for Technology Management (Pty) Ltd. Registered with the Department of Higher Education and Training as a private higher education institution under the Higher Education Act, 1997. Registration No. 2004/HE07/003. This qualification is accredited by the Council on Higher Education and registered on the National Qualification Framework (NQF) by the South African Qualification Authority (SQA).
